**General Description:**

Controls data readout from up to 50 printing modules; transfers digital data to one of two comm links, rs-232-c or 20-ma current loop; transfers control information from comm link to scaler loop; Isi circuitry including a microprocessor; p12v-385ma, m12v-80ma; 8.714 in. Lg; 2.700 in. W

**Fsc Application Data:**

Stellar photometric system

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
