Power Source:

External

Input Intelligence Type:

Digital

Output Intelligence Type:

Digital

Special Features:

Data is erased via ultra violet light exposure (2537 angstrom wavelength at 12 000 uw/cm2 for 20 minutes); main components include circuit card (3004904-1); programming software (2991386), terrain following radar software (2977527) and digital flight line tester software (2977528)

Functional Description:

Erases, reprograms, and verifies the mission code on the computer line replaceable unit microprocessor boards and the digital flight line tester microprocessor code for the an/apq-171 () terrain following radar on the f-111 afct

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
