Alternating Current Voltage Rating In Volts:

90.0 and 275.0

Power Source:

External

Product Name:

Optima light

Phase:

Single

Special Features:

For devices up to 48 pins; can be upgraded to the optima; task link for windows software interface; small foot print; universal device support for memory, microcontroller and logic devices; 48 universal analog/digital pin drivers with unlimited pin driver expansion; supports dip, plcc and soic packages with universal tops; supports flash tops; supports tsop, pga, qfp, mbga and other packages with optional adapter; 1.8 volts low-voltage support

Frequency In Hertz:

50.0 and 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A30800
