Overall Length:

53.000 inches

Overall Height:

75.000 inches

Overall Width:

24.000 inches

Storage Tempurature Range:

-4.0/+140.0 degrees fahrenheit

Unpackaged Unit Weight:

1200.000 pounds

Product Name:

Sun fire e6900 server enterprise powerhouse with mission critical ras

Special Features:

Up to 24 ultrasparc iv+ and/or ultra sparc iv processors; up to six uniboard cpu memory boards four processors each up to 64gb per board;

main memory up to 384 gb per domain; 32 pci-x slots; operating temp -4 to 140 degrees f; altitude up to 10, 000 feet

Functional Description:

Powered by up to 24 high-performance ultrasparc iv processors the sun fire e6900 server delivers maximum scalability and productivity to

address demanding workloads in the datacenter

Relationship To Similar Equipment:

Superceded by sun sparc enterprise m8000

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
