Disk Diameter:

5.125 inches

Disk Density Rating:

Ds/dd

Tracks Per Inch:

48

Special Features:

Disc substrate 3 military polyester; disc coating thickness 100 microinches gamma ferric oxide; 1.125 inch inside dia; 0.100 inch index hole; 5.250 inch square jacket outside dimensions; jacket material matte vinyl; operating temp. Range 50 to 125 degrees fahr; for double headed drive and double density media; sectoring 16 hard; write protect jacket; 80 tested tracks; 7958 bits per radians; tested capaci type 500 kilobytes per disc; no hub ring

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A501q0
