General Description:

Servo type, size 23, incremental shaft encoder, starting torque shall be 5.0 inch-ounces, operating speed 50 khz, operating temperature 0 degrees c to 55 degrees c, sealed against oil, moisture and dust, have a 0.250 in. Diameter stainless steel shaft, stainless steel ball bearings, pulse rate of 2000 pulses per revolution, 50 khz output, 2.250 in. O/a dia, 3.640 in. O/a lg

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
