Overall Length:

8.500 inches

Overall Height:

4.750 inches

Overall Width:

1.500 inches

Operating Temperature Range:

+0.0/+70.0 degrees celsius

End Application:

4920-01-279-5988, test station, memory

Indicator Type:

Indicating light

Unit Design:

Panel mounted

Voltage In Volts And Current Type:

5.0 dc

Interface Type:

ieee 488

Special Features:

Plugs into an 8 x 64 wide band switching matrix model 4076b-32 testing unit; acts as an interface unit which accepts ascii data via the ieee-488 instrumentation bus and converts it to a 16 bit parallel message; listening/talking device, transfers data at 11 kb per sec when talking and 5 kb per sec when listening; control is achieved via 8 data, 8 control and status messages; data transfer is byte serial using a three-wire handshake per ieee-488 standard 1978

Unpackaged Unit Weight:

1.750 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A50810
