End Application:

Tomahawk missile

Component Type And Quantity:

1 board

Product Name:

64mb module

Special Features:

Used on hewlett-packard apollo 9000 series 700 model 743i's & 743rt's; has standard memory of 16 mb (removable); memory of 128 mb single-slot model; expansion of 2 sockets; host type unix work station; class of mini computers and work stations; central processor of either 64 or 100 mhz hp pa-risc; bus architecture of hp precision bus (hp-pb); native o/s of hp-ux

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
