Overall Diameter:

2.520 inches

End Application:

B-2 bomber, aircraft (atb)

Voltage In Volts And Current Type:

10.0 dc

Special Features:

Incremental optical encoder, emi shielding, 40 lb abec 7 bearings matched thermal coefficients on critical componets and custom high-efficiency optics

Material:

Aluminum and stainless steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
