End Application:

Control

Usage Design:

Consists of a variety of i/o, networking, user-interface, and power modules that integrate to form a high-performance programmable automation controller (pac)

Mounting Configuration:

Mounting alternatives include surface mounting (directly bolted to a machine or device), din rail mounting, or pipe mounting (with optional accessories)

Component Type And Quantity:

1 module

Product Name:

Chameleon user-configurable module, ucm-2

Special Features:

Includes grid to align hardware components within the module; equipped with two interconnected pc boards and several terminal board connectors, mounting holes for tie-wraps to provide wiring strain-relief, and sealed stuffing tubes for wiring access points; in "lay man's terms, " this module is part of a controller which is custom-built to user's specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
