Operating Temperature Range:

-40.0/+85.0 degrees celsius

Special Features:

This item is a true bipolar input, single supply, 12-bit, serial 6 us adc in 8 pin package; 12 bit adc operates from a single +5v supply, housed in a small 8-pin mini-dip and 8 pin soic; linearity error + or - 1sb; snr 70db; analog input voltage to agnd + or - 17v max

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A50810
