Mounting Type:

Leg

Overall Depth:

40.000 inches

Overall Height:

53.625 inches

Overall Width:

39.875 inches

Height:

20.000 inches

Current Type:

Ac

Frequency Rating:

60.0 hertz

Maximum Power Dissipation Rating:

12.5 kilowatts

Compartment Quantity:

1

Operating Control Type:

Thermostatic

Voltage Rating:

480.0 volts

Design Type:

Sectional

Temperature Indicating Device:

Included

Heating Method:

Electrically

Intermediate Rack Quantity:

5

Criticality Code Justification:

Supp

Depth:

27.375 inches

Phase:

Three

Special Features:

For naval shipboard use w/26x66 in. Hatchability

Supplementary Features:

Generic nsn

Width:

29.000 inches

Specification Or Standard:

1 type and 2 size

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T281-e
