Overall Length:

5.625 inches

Overall Width:

3.750 inches

Battery Quantity:

2

Carrying Case:

Provided

Keyboard Type:

Scientific and statistics

Operation Method:

Disposable battery

Unit Type:

Programmable

Power Source:

Battery

Display Type:

Liquid crystal

Digit Entering Capacity:

12

Programming Method:

Keyboard

Key Function For Which Designed:

Decimal and factorial and logarithmic/exponential and rectangular-polar coordinates conversion and square root and trigonometric

Special Features:

Type g-10 lithium batteries; automatic turn-off

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T084-c
