Accessory Components And Quantity:

Spray pump 1

Product Name:

Dfo powder

Special Features:

emission spectra is 570 nanometers; especially useful on multi-colored surfaces where the background would interfere with photography; reacts with amino acid content of fingerprint residue; will not interfere with subsequent analysis using ninhydrin; silver nitrate or physical developer; some testing indicates that dfo is effective for developing latent blood prints; produces red or pink latent prints; florescence produced ultraviolet light and alternative light sources; packaged in pump spray; 100 ml premixed reagent

Functional Description:

Used for developing latent prints on porous surfaces

Color:

Red

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
