Surface Luster:

Lusterless

End Application:

Astor airborne radar

Width:

0.500 inches

Length:

36.0 yards

Temperature Rating:

Between -100.0 degrees fahrenheit and 400.0 degrees fahrenheit

Min. Tensile Strength (psi):

12 pounds per square inch

Nominal thickness:

1.0 millimeters

Adhesive Location:

One side

Product Name:

Tape, polyimide, silicone adhesive, pressure-sensitive

Special Features:

High-temperature, polyimide film coated on one-side with a silicone pressure-sensitive adhesive; shelf life shall be a of 12 months when stored in original, unopened container

Color:

Yellow

Material:

Plastic polyimide

Material Specification:

Mil-p-46112, grade a military specification single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A14300

Mil-std (military Standard):

Mil-p-46112 spec.
