Product Name:

Sirs professional manual psychological

Special Features:

The sirs (structured interview of reported symptoms) is designed to detect malingering and other forms of feigning of psychiatric symptoms; consists of 8 primary and 5 supplementary scales for the assessment of feigning, including a scale to assess defensiveness; the content of each scale varies so that endorsement of items on a particular scale does not reflect any specific mental disorder; to be administered by any mental health professional with formal training in structured interviews
