Mounting Type:

Floor surface, free standing

Overall Length:

80.000 inches

Overall Height:

68.000 inches

Overall Width:

32.000 inches

Specific Use:

Exercise

Usage Design:

Knee

Unit Type:

Stationary

Weight:

326.0 pounds

Err Default:

Err default

Features Provided:

Footplate and retractable reel

Product Name:

Elliptical exerciser

Frame Material:

Steel

Special Features:

Has following programs: cross country, cross training, fitness test, heart rate, hill climb, interval, manual, weight loss; has following electronic readouts: average heart rate, average speed, calories, calories per hr, calories per min; self-powered; cross ramp is 20 degrees fixed; stride length 21.5 inches; additional usage design: upper torso-back, feet, ankle, abdomen, and arm; soace efficient; low maintenance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A543r0
