Physical Form:

Concentrated liquid

Asphalt Surface Usage Feature:

Not included

Water Usage:

Required

Primary Container Content Quantity:

1.000 gallons

Special Features:

Liquid emulsifier, water base, concentrated mixture of mild alkalies, detergents, and a 5.0 percent organic solvents, (glycolethers); use full strength or diluted with water, proportions varying with soil and surface; non-toxic, biodegradable, alkaling but not caustic; used on most metal surfaces; on household and industrial walls and concrete floors; on paint and other finishes, on glass, upholstery, plastic, and tires; for removing grease and oil, dirt and wax from machinery and equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T329-a
