General Description:

Unique non-abrasive product made specifically to remove draggy coating from the bottom of hot irons, no waiting for iron to cool down before cleaning it; cleaner removes iron-on fusibles, interfacings, trims and patches that sometimes melt on the iron sole plate, also removes fabric deposits, melted synthetics or plastic and starch build-up, contains lubricants to make the iron glide; cleaner is nonflammable and nontoxic, safe for all metal, polytetrafluoroethylene and silverstone surfaces
