# Material Type:

Silica minerals

## Product Name:

Molsiv absorbent type 4a

## Special Features:

Sodium form of the type of crystal structure, alkali metal almino-silicate; type 4a will absorb molecules w/critical chambers up to 4

angstroms; available in powder form

# Shelf Life:

N/a

## Unit Of Measure:

--

## Demilitarization:

No

Fiig:

Т329-е
