**Material Type:**

Silica minerals

**Product Name:**

Molsiv absorbent type 4a

**Special Features:**

Sodium form of the type of crystal structure, alkali metal almino-silicate; type 4a will absorb molecules w/critical chambers up to 4 angstroms; available in powder form

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T329-e
