Physical Form:

Solid

Nontoxic Feature:

Not included

Corrosive Characteristics:

Noncorrosive

Features Provided:

Biodegradable

Special Features:

Bacteria/enzyme based formulation for all type of biological wastewater treatment systems; effective in both aerobic and anaerobic systems; suitable for domestic, commercial, municipal, agricultural, food processing and trade waste systems; typical dose of 1-5 ppm of flow is effective

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T329-a
