General Description:

Polyether type polymeric isocyanates; 200 porm 50 centipoise at 78 degrees f viscosity for component a; 300 porm 75 degree f viscosity component b; one to one mix ratio by volume; 2.0 porm .3 lb per cu.Ft. Core density; compression strength of 30 psi min parallel to rise and 20 psi min perpendicular to rise

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
