Specific Use:

General purpose

Quantity Within Each Unit Package:

5.000 gallons

Storage Type:

Temperature controlled warehouse

Features Provided:

Chromate free and flammable

Basic Material Type:

Petroleum spirits thinner and butyl alcohol

Material Type For Which Designed:

Alkyd resin

Volatile Organic Compound In Grams Per Liters:

600.0

Special Features:

Not photochemically reactive as defined by scaqmd rule 102, contains less than 1.0 percent aromatics, no ozone depleting substances (ods), and no halogenated compounds; noncorrosive and clear; relative evap rate is 1.5 or less than that of n-butyl-acetate

Media For Which Designed:

Synthetic resin enamel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A09700
