Application Method:

Spraying after thinning

Gloss Designation:

Gloss

Pigment Material Type:

Strontium chromate and epoxy and silica

Vehicle Material Type:

Natural crystalline flake and epoxy

Finish For Which Formulated:

Fine

Product Name:

Primer 37092

Special Features:

Dry film thickness: 20 - 30 um 0.8 - 1.2 mil, application: temperature; 15-35 degree c or 59 - 95 degree f, relative humidity: 35 - 75%, gloss (60 degree) 20 gu, color: green/yellow, bac 452 black, storage: product dry @ temperature between 5 & 25 degree c/41 & 77 degree f in unopened container. Shelf life: primer 24 months, flammable.

Color:

Black and green and yellow

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A09700
