**Tempurature Rating:**

150.000 degrees fahrenheit

**Basic Ingredient:**

Tetrafluoroethylene

**Quantity Within Each Unit Package:**

4.000 ounces

**Usage Design:**

For metal and plastic pipe threads

**Reference Number Differentiating Characteristics:**

As differentiated by unit package type and quantity within each unit package

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A535n0
