Physical Form:

Liquid

Quantity Within Each Unit Package:

10.000 gallons

Specific Usage Design:

For sealing joints and cracks in portland cement concrete pavements subject to spillage of jet fuels, lubricating oils and to direct heat and blast of aircraft engines

Features Provided:

Separate catalyst

Rated Drying Time:

12.000 hours

Special Features:

Hand mixed formulation

Color:

Black

Material:

Plastic urethane

Supplementary Features:

5 gallons base and 5 gallons curing agent

Specification Or Standard:

H type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
