Temperature Rating:

18.0 degrees celsius

Specific Usage Design:

Environmental sealing and protection for various parts and substrates on missiles, rockets, aircraft and launch equipment

Curing Method:

Air dried

Rated Drying Time:

72.000 hours

Special Features:

Rated drying time at 77 degrees f and 50 pct relative humidity; physical form: film

Color:

Colorless

Material:

Silicone

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A536d0
