Tempurature Rating:
18.0 degrees celsius
Specific Usage Design:
Environmental sealing and protection for various parts and substrates on missiles, rockets, aircraft and launch equipment
Curing Method:
Air dried
Rated Drying Time:
72.000 hours
Special Features:
Rated drying time at 77 degrees f and 50 pct relative humidity; physical form: film
Color:
Colorless
Material:
Silicone
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A536d0
