Physical Form:

Paste

Specific Usage Design:

For sealing and insulating of electric connectors, wiring, and other electric apparatus in fuel exposed applications

Curing Method:

Heat

Rated Working Time:

2 hours

Rated Drying Time:

48.000 hours

Special Features:

Supplied as a two-part kit; basic material: manganese dioxide and polysulfide; rated drying time at 140 degrees f

Color:

Black

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
