| Tempurature Rating:                      |
|--|
| 120.0 degrees fahrenheit                 |
| Physical Form:                           |
| Liquid                                   |
| Specific Usage Design:                   |
| Repairs tooling and molding applications |
| Curing Method:                           |
| Air dried                                |
| Features Provided:                       |
| Separate catalyst                        |
| Color:                                   |
| Black                                    |
| Material:                                |
| Plastic urethane                         |
| Shelf Life:                              |
| N/a                                      |
| Unit Of Measure:                         |
|  |
| Demilitarization:                        |
| No                                       |
| Fiig:                                    |
| A536d0                                   |
