Specific Usage Design:

Provides electrical conductivity and emi/rfi sheilding effectiveness

Product Name:

Electrically conductive sealant

Special Features:

Used on the eurofighter 2000; electrically conductive; rapid cure; corrosion inhibitive; two part nickel filled epoxy cured permadol p-3.1 polythioether; standard cure 7 days at 77 degf 50 percent rh; cured specific gravi type 1.98; shear strength 185 psi; 9 month storage at 80 degf or below

Color:

Black

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A536d0
