Tempurature Rating:

250.0 degrees fahrenheit

Physical Form:

Paste

Specific Usage Design:

Fillet sealing of fuel tanks and aircraft fuselage

Curing Method:

Air dried

Rated Drying Time:

14.0 days

Product Name:

Low weight fuel tank sealant

Special Features:

Manganese dioxide cured permapol modified polysulfide

Color:

Black and brown and off-white

Material:

Rubber

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A536d0
