Tempurature Rating:
250.0 degrees fahrenheit
Physical Form:
Paste
Specific Usage Design:
Fillet sealing of fuel tanks and aircraft fuselage
Curing Method:
Air dried
Rated Drying Time:
14.0 days
Product Name:
Low weight fuel tank sealant
Special Features:
Manganese dioxide cured permapol modified polysulfide
Color:
Black and brown and off-white
Material:
Rubber
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A536d0
