Physical Form:

Paste

Specific Usage Design:

Two-part paste is suitable for edge filling of honeycomb structures and/or metal fairings as well as for bonding applications

Curing Method:

Air dried

Rated Drying Time:

24.0 hours

Product Name:

Epoxy syntactic

Special Features:

Density of paste is 1.6 gm/cc, consistency is a trowelable slumping paste, a two-part rt cure system and 20 min gel time

Color:

Gray

Material:

Resin epoxy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A536d0
