Physical Form:

Powder

Quantity Within Each Unit Package:

10.0 kilograms

Specific Usage Design:

For stopping water flow and permanently sealing deep cracks and holes in all grades of concrete

Curing Method:

Air dried

Rated Drying Time:

Between 3.0 minutes and 5.0 minutes

Product Name:

Quick plug hydraulic cement

Special Features:

Creates a watertight seal, even while water is flowing; can also be used as an anchoring cement; quick plug hydraulic cement may be used for interior and exterior applications and when mixed properly; setting time: 5 minutes; final cure: 28 days; container: pail

Color:

Gray

Material:

Cement

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A536d0
