Physical Form:

Liquid

Quantity Within Each Unit Package:

1.000 gallons

Specific Usage Design:

Used to attach foam absorber to walls as in anechoic chambers where the non-flammable integrity of the absorber must be maintained; can also be used as a primer for neoprene sheathed cable when using epoxides for connector potting

Special Features:

Solvent based; non-flammable when cured; good adhesion to neoprene, natural and synthetic rubber, nylon, wood, glass, ceramics, and most plastic materials; can be applied by brush, spray, or roller coat

Color:

Yellow

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
