Physical Form:

Liquid

Quantity Within Each Unit Package:

1.000 pounds

Specific Usage Design:

For electronics bonding applications

Features Provided:

Separate catalyst and heat vulcanize feature

Rated Drying Time:

1.000 hours

Special Features:

Silver filled; electrically conductive; elevated temperature cure; 1 hour at 80 degrees c or 5 minutes at 150 degrees c

Color:

Silver

Material:

Plastic epoxy

Supplementary Features:

1 pound kit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A535p0
