End Application:

B-2

Physical Form:

Film

Special Features:

Rolls are 1 ft wide x 10 yd long

Supplementary Features:

Fm 57 film adhesive is a condensation polyamide adhesive supplied as a supported film with a woven fiberglass carrier; fm 57 does not contain mda; service temperature -67 to +550 deg.F; suitable for bonding metallic and non-metallic substrates, as well as honeycomb structures; weight 0.10 plus or minus 0.010 psf

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A535p0
