Physical Form:

Liquid

Quantity Within Each Unit Package:

1.000 pounds

Specific Usage Design:

For use where high compression stress is applied to encapsulated electronic circuitry

Features Provided:

Separate catalyst

Rated Drying Time:

24.000 hours

Special Features:

Forms a low density, high strength foam

Material:

Plastic epoxy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A535p0
