Physical Form:

Liquid

Quantity Within Each Unit Package:

Six 10 gram resin mixing jars, 15 ml btl curing agent, 5 calibrated pipettes, 6 stirring rods

Specific Usage Design:

For application of strain gauges, may also be used for cryogenic applications

Features Provided:

Separate catalyst

Rated Drying Time:

48.000 hours

Special Features:

Epoxy resin and amine hardener; operating temp range-minus 320 to 200 degrees f; color-clear to amber

Color:

Amber

Material:

Plastic epoxy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A535p0
