**Special Features:**

Gray; glass transition at 90 degc; ionic data: chloride 50ppm, sodium 30ppm, potassium 5ppm; silver-filled electrically-conductive adhesive film designed for bonding substrates to carriers; suitable for microwave and rf applications and for where low epoxy flow is desired; high bonding pressure (10psi) precludes use on small fragile structures; available in 10"x12" sheets in thicknesses of .002" and .004"

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**
