End Application:

F-22 aircraft

Physical Form:

Liquid

Specific Usage Design:

For bonding strain gages

Content Within Each Unit Package:

Four 8 gram bottles of resin, four 11 gram bottles of curing agent, 4 brush caps for dispensing mixed adhesive, and 4 disposable mixing funnels

Features Provided:

Separate catalyst

Special Features:

Solvent thinned; long term service temperature range of minus 452 degrees f to plus 500 degrees f; 3 month shelf life at room temperature, 9 month shelf life at 40 degrees f

Material:

Plastic epoxy and plastic phenolic

Supplementary Features:

Four 19 gram kits

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
