Physical Form:

Liquid

Curing Method:

Air dried

Minimum Flash Point:

188.0 degrees fahrenheit

Rated Drying Time:

24.000 hours

Special Features:

Kingredients heterocyclic methacrylate, polyethylene based rubber, alkyl methacrylate, methacrylic acid, cumene hydroperoxide, epoxy resin; boiling point more than 300 degf; tensile strength 3000 psi; size is 250ml

Color:

Yellow

Supplementary Features:

Place in fixture for 1-2 minutes before drying

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A535p0
