Temperature Rating:

100.0 degrees celsius

Physical Form:

Paste

Specific Usage Design:

For bonding and small potting of plastic or glass optical fibers, lenses, prisms, led displays, and other optical components

Features Provided:

Separate catalyst

Rated Drying Time:

24.000 hours

Special Features:

Optically clear; low viscosity; mechanical impact and thermal shock resistant; resistant to weather, water, gases and vapors, petroleum products, salts, mild acids and alkalis

Color:

Clear

Material:

Plastic epoxy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A535p0
