Tempurature Rating:
100.0 degrees celsius
Physical Form:
Paste
Specific Usage Design:
For bonding and small potting of plastic or glass optical fibers, lenses, prisms, led displays, and other optical components
Features Provided:
Separate catalyst
Rated Drying Time:
24.000 hours
Special Features:
Optically clear; low viscosity; mechanical impact and thermal shock resistant; resistant to weather, water, gases and vapors, petroleum
products, salts, mild acids and alkalis
Color:
Clear
Material:
Plastic epoxy
Shelf Life:
N/a
Unit Of Measure:
<del></del>
Demilitarization:
No
Filg:
A535p0
