Usage Design:

Employed as a hardener in epoxy resin system

Igniting Characteristic:

Flammable

Product Name:

Nadic methyl anhydride

Special Features:

Excellent weathering and aging properties; resistance to heat and arcing; superior thermal mechanical and electrical properties; uses for filament winding, potting, encapsulation, and high performance electrical boards

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A536p0
