Physical Form:

Paste

Specific Usage Design:

Thermally conductive, resilient epoxy adhesive provides strong bonds to metals, such as gold, silver, copper, brass, and solder.

Curing Method:

Heat

Rated Drying Time:

Between 45.0 minutes and 90.0 minutes

Product Name:

Thermally conductive epoxy adhesive

Special Features:

Hardness is; shore d, 90

Color:

Blue

Material:

Plastic epoxy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A535p0
