Maximum Operating Pressure:

4350.0 pounds per square inch

Specific Gas For Which Designed:

Air

Cylinder Style Designator:

Cylindrical type

Capacity Rating:

61.0 cubic inches

Neck Thread Location:

Internal

Thread Diameter:

18.0 millimeters internal

Special Features:

41, 500 psi yield strength; aluminum alloy 6061-t6 liner material; epoxy resin material; carbon/glass reinforcement material; 13, 050 psi burst pressure

Thread Size And Series/type Designator:

-18x1.5-6h iso m internal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T162-b
