Width:

48.000 inches

Performance Type:

Heavy duty

Physical Form:

Roll

Moldable Feature:

Not included

Self-adhering Material Location:

Greaseproof side

Special Features:

This material is intended for applications requiring a flexible, heat sealable, barrier materials with low mvtr and physical strength. It can be used for the protection of extremely critical or sensitive devices susceptible to damage by esd, emi, moisture and corrosion. Roll length is 200 yards. Mfg name: barrier stock, roll

Specification Data:

-81349-mil-prf-81705d t/1 government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T125-c

Mil-std (military Standard):

Mil-prf-81705d spec.
